

Green Supply Chain Policy

At Techno Electric & Engineering Co. Ltd, we recognize the profound impact of our operations on the environment and society. This Green Supply Chain Policy outlines our commitment to fostering sustainability, ethical practices, and environmental responsibility through an inclusive approach that encompasses the activities of its Supply Chain Partners (SCPs), viz. Vendors, Contractors, and Service Providers.

Vision and Mission:

Our vision is to be a leader in our industry by creating a sustainable future through innovative engineering solutions and responsible procurement practices. Our mission is to integrate environmental stewardship into every facet of our supply chain activities.

Policy Statement:

We, at Techno Electric & Engineering Co. Ltd, are dedicated to developing and implementing a green supply chain that minimizes our ecological footprint, reduces waste, conserves resources, and enhances the well-being of our planet and communities.

Scope:

This policy covers all supply chain stages within Techno Electric & Engineering Co. Ltd, including sourcing, procurement, transportation, distribution, and waste management.

Key Objectives:

1. **Reduce Carbon Footprint:** We will strive to reduce greenhouse gas emissions across our supply chain, from project conception to completion.
2. **Minimize Waste:** We are committed to minimizing waste generation, promoting recycling, and responsible disposal.
3. **Ethical Sourcing:** We will prioritize SCPs who adhere to ethical practices and demonstrate a commitment to sustainability.
4. **Resource Efficiency:** We will optimize resource usage, including energy and water, in our processes and operations.
5. **Stakeholder Engagement:** We will engage employees, suppliers, clients, and communities in our sustainability efforts.

Guiding Principles:

1. **Environmental Responsibility:** We will hold ourselves accountable for minimizing our impact on the environment.

Techno Electric and Engineering Company Ltd.

- 2. Collaboration: We will collaborate closely with suppliers, partners, and stakeholders to achieve our sustainability goals.
- 3. Compliance: We will adhere to all relevant environmental laws, regulations, and industry standards.
- 4. Innovation: We will seek innovative solutions to reduce our environmental impact.

SCP Selection and Evaluation:

SCPs will be evaluated based on their environmental practices, ethical standards, and commitment to sustainability. Additionally, we will foster long-term relationships with SCPs who share our values and objectives.

Energy Efficiency:

We will implement energy-efficient practices in all stages of our supply chain, from design to commissioning.

Emissions Reduction:

We will work to reduce emissions through responsible project execution.

Waste Management:

We will minimize waste generation, promote recycling, and ensure proper disposal of hazardous materials as also outlined in our Waste Management Policy.

Stakeholder Engagement:

We will engage employees, clients, suppliers, and communities in sustainability initiatives through communication and collaboration.

Training and Awareness:

We will provide training to employees and suppliers to increase awareness of sustainability practices and their role in implementation.

Continuous Improvement:

We are committed to regularly evaluating and improving our green supply chain policy based on evolving best practices and technological advancements.

By adhering to this Green Supply Chain Policy, Techno Electric & Engineering Co. Ltd aims to lead the industry in sustainability, creating a positive impact on the environment, society, and our business.
